Subject: Production of Fly Ash and Cement Stabilized Earth Blocks for utilizing in the construction of IAY House – Rate contract for the machinery – Regarding.

Sir

I am directed to refer to your mail forwarding the detailed project report on production of Fly Ash bricks and Cement Stabilized Earth Blocks. Keeping in view the interest shown by the States for production of these bricks during the Regional Review Meetings, it is estimated that there would be considerable demand for production of these materials. This would mean that states would have to procure the machinery that is used in the production of the materials. Since states do not have the technical competence to procure the appropriate machines, it is proposed to prepare a rate contract for different kind of machines for both materials so that states can choose from this list.

In view of the above, you are requested to get the rate contract for the most cost effective machinery that can be used for production of CSEB and Fly Ash Bricks indicating the capacity, technical specification and the price of each type of machines.

Yours faithfully,

(M. Rama Krishna)
